

CARE KIT

CARE & USE

Contents of Kadai Bag:

- 125ml Owatrol Oil
- Oil brush
- Abrasive Pad x4
- Cotton Cloth x2

How to use your Care Kit:

1. Using the abrasive pad, rub down your Firebowl and Stand to remove any loose rust. NB: Do not take back to bare metal as Owatrol Oil adheres to lightly rusted areas.
2. Use the oil brush to apply a thin coat Owatrol Oil to the inside and outside of the bowl.
3. Use a cotton cloth to evenly spread out the oil, remove any excess and achieve an even sheen. Once dry the bowl will have a lightly oiled finish. If required apply further coats for greater protection after 3-4 hours.
4. Leave for 24 hours before lighting the Kadai.

The Firebowl will take on a natural rust, this is part of the character of the bowl. We recommend that the Kadai bowl is coated with Owatrol Oil at least once a year. This technique can NOT be used on any Cookware Accessories.
